

NICOLAS KELLEY

Full-Stack Software Engineer | .NET • C# • Javascript • SQL | UX-Focused

Mexico City, Mexico • nicokelley97@gmail.com • [LinkedIn Profile](#) • +52 55 5177 2549

Full-Stack Software Engineer with 3+ years of experience developing web applications and solving complex technical problems across interconnected systems. Particularly interested in UI/UX and building software that is intuitive, useful, and technically sound. Has led system modernization efforts, worked directly with clients to diagnose complex issues, and overseen and mentored other engineers. Outside of work, builds personal projects, including a Unity game and an e-commerce system for managing and selling collectible cards, to explore new technologies and ideas through hands-on development.

PROFESSIONAL EXPERIENCE

Solera Holdings, LLC | Apr 2023 – Aug 2026

- **Software Development Engineer II** | Jun 2025 – Aug 2026
 - Led major technology migrations and modernization efforts, including .NET Framework to .NET Core and TFS CI/CD to GitHub.
 - Worked across 15+ interconnected microservices, optimizing shared functionality and high-volume data workflows.
 - Oversaw and mentored engineers, providing technical guidance and addressing blockers.
 - Worked directly with clients to diagnose complex production issues, investigating root causes and guiding technical solutions.
- **Software Development Engineer I** | Jun 2023 – Jun 2025
 - Developed and maintained a full-stack product, delivering features and resolving issues across application code and SQL databases.
 - Built and maintained third-party integrations, troubleshooting API issues and ensuring reliable data exchange.
 - Worked directly with clients to reproduce and diagnose technical issues.
- **Software Developer Engineer - HPEL** | Apr 2023 – Jun 2023
 - Selected as a high-potential entry-level engineer and developed full-stack skills in C#, SQL Server, JavaScript, and REST APIs during the program.
 - Worked closely with senior engineers to debug, optimize, and implement scalable solutions.

Odoo | Nov 2022 – Apr 2023

- **Functional Support Analyst** | Nov 2022 – Apr 2023
 - Troubleshoot client issues, supported application customization, and analyzed data to identify inefficiencies and solutions.

Hospitales Star Médica | Jan 2022 – Jun 2022

- **Biomedical Engineer** | Jan 2022 – Jun 2022
 - Managed SQL databases for medical equipment planning and allocation across hospitals.
 - Operated medical equipment and supported medical teams during surgical interventions.

EDUCATION

- **BE, Biomedical/Medical Engineering** - Universidad La Salle | Ago 2015 – Dec 2020

TECHNICAL SKILLS & LANGUAGES

- FE & BE: JavaScript, React, Next.js, UI/UX, C#, .NET, .NET Core, REST APIs, Python
- Data & Integrations: SQL, SQL Server, Database Management, API Integration
- Development & DevOps: GitHub, TFS, CI/CD, Docker, Unity
- AI-Assisted Development: Claude, Cursor, GitHub Copilot
- Languages: Spanish (Native) · English (Native) · Italian (Conversational)
